

How your views have been used

Libraries and Library Services

In this survey we were keen to understand library use and awareness of library services. The insight will help us shape how we can support our communities to use and engage with the library and the services available.

This survey was sent to all 836 Voice of Warwickshire panel members. Insights will help to identify, understand and meet users needs along with developing an understanding of non users of the services and what could be done to ensure the service is accessible to them.

A total of 41.4% (n=364) members of the panel completed the survey.

How your responses have been used:

- Insights from the survey will help develop a marketing and communications strategy to promote libraries and what they can provide
- Survey results will be used to help identify, understand and meet library users needs
- Responses will help inform future planning for the library and library services
