TRANSPORT INNOVATION

Zarah Sultana MP  @zarahsultana · May 7

...

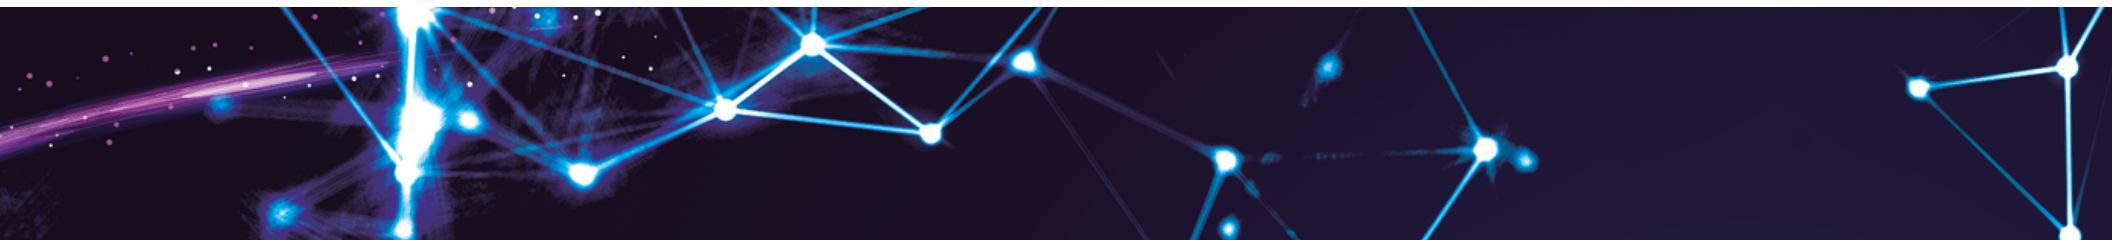

Our railways could provide high-quality, affordable and green transport, fit for the future. But that requires serious investment (and public ownership!).

That's why I was excited to join the opening of new Coventry Station today, an £82 million transformation project 😊

"Great performance from Highly Sprung and top engagement with the diversity of the young people. For me that's what City of Culture and its legacy should be about."

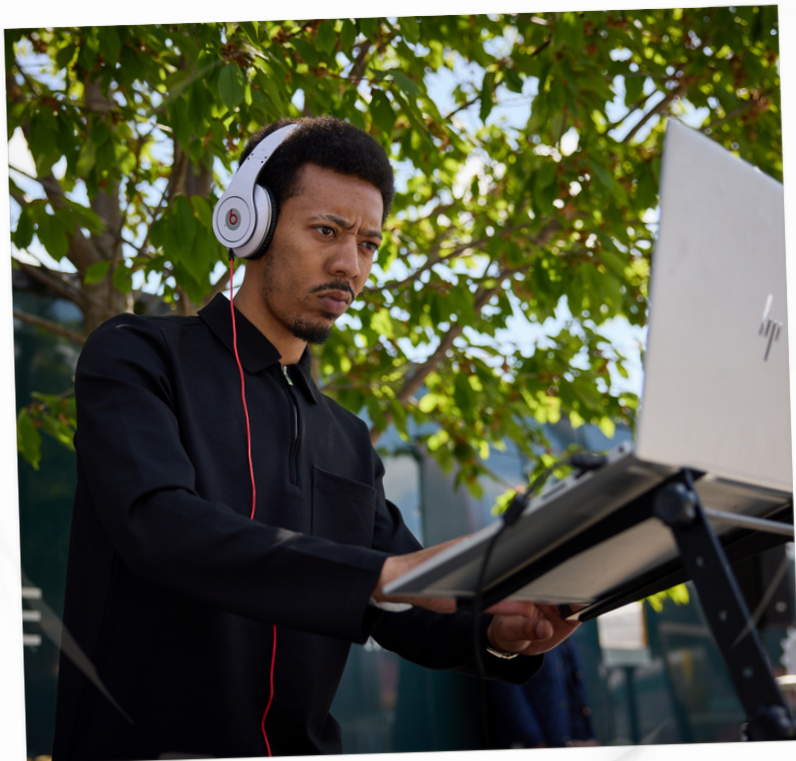

"A Star made of dreams and futures
not yet known appeared before
them"

In Transit

"The train bursts from its tunnel shining bright,
it is ready to connect us once more, in a
greener, more vibrant world.."

In Transit

"The community day was great, lots of engagement and the mix of excellent entertainment, family activities and info stands worked really well in attracting footfall."

CULTURE

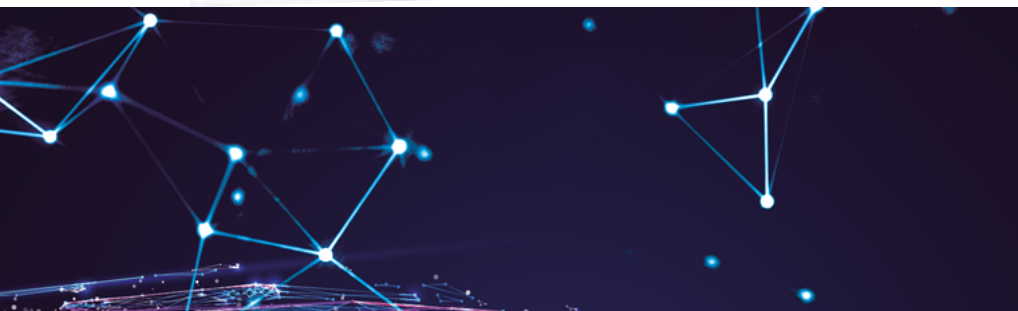

CREATIVITY

"This is the city of invention, it doesn't stand still. It forges on, not full steam ahead, but with a mind to protect each other and our environment"

In Transit

"In Transit was absolutely superb."

"At once inspired, a dream of a new world begins. The dream of a world of travel"

CANVA STORIES

"The Coventry Station Community Day was an absolute joy to see - there was a wide array of visitors on the day from those just passing though, caught in the infectious fun of the event, to those who had travelled specifically to get involved - but one thing everyone had in common was the pride shared for the City!"

"They come in hope, they come in peace, united as one."

Arriving by train, carrying their hopes for a better future."
