

B4113 Coventry Road, Nuneaton

Casualty Reduction Scheme Overview

Site Description

The route subject to this study is the B4113 Coventry Road, running from its southern junction with Griff Roundabout, to its northern junction with A444.

The B4113 Coventry Road, Nuneaton is a single carriageway, two-way road running from North to South, and South to North. This route shares junctions with Donnithorne Avenue, Middlemarch Road, College Street, Shepperton Street, and George Eliot Street. This route is subject to a 50mph speed limit for approximately 0.6 miles, and 30mph for approximately 0.6 miles. This is an urban area, consisting of residential and commercial properties.

Collision data

A total of 10 Personal Injury Collisions have been recorded resulting in 12 casualties.

8 x slight in severity

2 x serious in severity

The majority of collisions occurred as a result of motorists failing to give way at the B4113 Coventry Road/Donnithorne Avenue roundabout.

WORKS IMPLEMENTED AS PART OF THE IMPROVMENT SCHEME.

The improvement works consisted of the installation of additional junction warning signage, and the renewal of junction give way markings.

Results

With these measures along the route and its junction, the Traffic and Road Safety Team envisage that these will reduce the number of collisions and casualties as motorists will have a greater awareness of the junctions.
