Strategy and Commissioning Manager (SEND & Inclusion)

Local Area SEND Inspection Update

- Thank you to everyone involved
- Key findings of the inspection
- What happens next

Local Area SEND Inspection

- Ofsted and CQC visited Warwickshire from 12 to 16 July to assess how effective the local area is in identifying and meeting the needs of children and young people with SEND age 0-25
- Inspectors collected information about children and young people; looked at records; spoke to officers, health professionals and leaders; and sought views of children, young people, parents and carers.
- Final letter to published on WCC & CCG websites on Thursday 23rd September, and Ofsted/CQC websites on Friday 24th September
- Whilst several areas were commended, the inspection also highlighted weaknesses that the local area needs to address

Local area SEND inspection - Key Findings

Strengths:

- Commitment of leaders to improve outcomes for children and young people with SEND
- Children and young people with SEND achieve positive educational outcomes. A high proportion remain in education, training and employment. Attendance rates are very positive, and fixed term exclusions have reduced dramatically.
- Leaders understand the strengths and weaknesses because of the accurate, well-informed and detailed self-evaluation.
- Leaders have developed and started to implement an ambitious change programme, which identifies what needs to change and why.

It has prioritised and focused on key areas, with further actions appropriately planned out in the right order. This is enabling area leaders to drive the necessary improvements across the local area.

However, some plans are still developing, such as those to improve neurodevelopmental pathways.

Rapid implementation of the Change Programme has already led to some improvements. For example, the area leaders now issue a higher than national proportion of new education, health and care (EHC) plans within statutory timescales.

Local area SEND inspection

Significant Areas of Weakness

- Waiting times for ASD assessments, and the support for children and young people awaiting assessment and following diagnosis of ASD
- Relationships with parent/carers and communication and co-production at a strategic level
- Incorrect placement of some children and young people with EHC plans in specialist settings, and mainstream school leaders' understanding of why this needs to be addressed
- Uptake of staff training for school staff to help them understand and meet the needs of children and young people with SEND
- Quality of the online local offer

What happens next?

- We will co-produce a Written Statement of Action with education, social care, health and Warwickshire Parent Carer Voice to submit by 24th December 2021
- Progress will be monitored by Department of Education and NHS England up to March 2023
- Engagement and co-production with partners and stakeholders including schools, providers, children and young people, parents and carers
- Regular updates on progress will be provided, including a report to Cabinet on 9th December 2021
