

# Warwickshire County Council

## Warwickshire Education Sufficiency Strategy 2024-2029

**Priority 1: Right places at right time**

Work strategically to understand and anticipate the impact of future potential changes in birth rates, early years funding entitlement, migration trends, changing needs, and housing development.

**Priority 2: Effective commissioning to deliver best value**

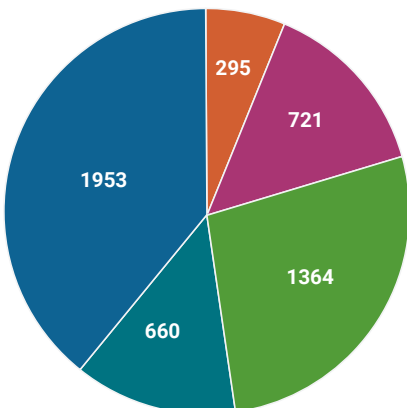

Pursue opportunities to use existing accommodation more effectively, future proof new provision and achieve best value for money.

**Priority 3: Partnership and collaboration**

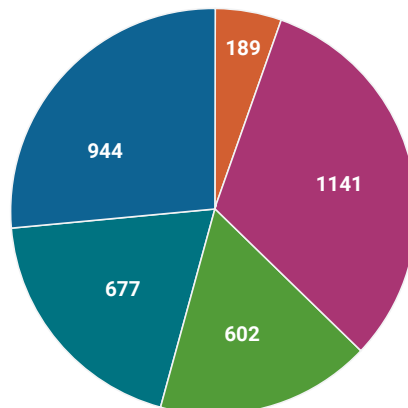

Communication and discussion with stakeholders and partners on proposals, ensuring always that the council's sufficiency duties take precedence.

**Priority 4: Managing and supporting change**

All education sufficiency plans will seek to build a long-term sustainable and viable education economy. Plans and proposals will be flexible and responsive to changing legislation, unexpected pressures and demands.
