Both are available for hire
North Leamington School	School
Cubbington C of E Primary School	School

CUBBINGTON, LILLINGTON & WARWICK DISTRICT EAST JSNA STAKEHOLDER EVENT
POUND LANE LEARNING CENTRE, LILLINGTON, TUESDAY 21ST MAY 2019

Overall impressions of data/gaps

- Comments were shared regarding the extent of the inequality experienced within the area and how this is not shared equally
- Concern was expressed as to how effective previous services commissioned had been at addressing some of the problems identified due to the ongoing inequalities identified. It was recognised that some programmes may well have been effective but short term funding and evaluation tools did not always support sustainability or share the right messages
- Intergenerational influences was raised as a possible cause of continued inequalities, feedback therefore from programmes like priority families would be useful in the area
- It was identified that social isolation and loneliness was not just an older persons issue, there were young parents and single mothers who needed to be included in this and those who are excluded from services due to financial constraints
- Missing data regarding those with learning difficulties
- Concerns were expressed that the community feeling in Lillington was being lost and people were unsure as to how to re-establish this and reconnect with their communities
- Health of young people in school - obesity, low levels of activity, poor diet, free schools meals
- Historical issues with families - intergenerational unemployment/involvement in crime
- Socio economic factors
- Low self-esteem, mental health issues - leads to criminal activity
- Need for creative thinking - new ideas to address issues
- Disparity across the area - relative poverty (areas of affluence v poorer areas)
- Low levels of diabetes diagnoses - signposting to community activities/community nurses
- Generally the group felt the data did reflect the area and highlighted the inequalities
- No real surprises in the data. The stand-out issues are around children's obesity and physical activity, and housing
- The place-based approach was welcomed, according as it does with the direction of other agencies' travel, e.g. the SWFT Place Based Teams
- How will the commissioning bodies deal with place-based rather than thematic data in practice? Will they use it to commission services on a more localised basis?
- The value of the JSNA data to the voluntary and community sector was recognised, e.g. as an evidence base to be referred to in funding applications. There needs to be better promotion of the data amongst VCS organisations, however. VCS organisations being aware of and having access to the data is crucial to community capacity building
- It is helpful to know what community assets are present, so that, for example the SWFT place-based teams can link patients into these assets
- There are strong links between the JSNA data, the identification of community assets especially, and the emerging social prescribing offer

Assets identified:

- MENCAP are raising the profile of their clientele needs by providing nurse training placements in their service to develop exposure for health sector staff
- Homeless shelter at William Wallsgrove has had a big impact on reducing homeless in local area
- Crown roots, Lillington based at Acorn Court supporting intergenerational work and tackling loneliness to improve the lives of those in the Lillington ward, providing cooked meals and chat groups, to combat social isolation
- Lillington Youth Centre
- Foodbank
- Crown roots
- Acorn community cafe
- Children's Centre
- CGL - need for drop in sessions in the community
- Compass - need for drop in sessions in the community
- Local churches
- History society
- Library
- Boxing Club
- Day nurseries
- Schools

Gaps identified / possible solutions:

- Low levels of attendance at schools
- Special needs amongst young people
- Signposting to community activities/community nurses
- Engaging with the community - residence not taking part in community activities. How is this encouraged/supported? How do we get the information to those that may be socially isolated
- Overcrowding - Houses of multiple occupation/large families
- Road Safety - two deaths on Kenilworth Road in recent years
- Door knocking to engage residents
- Using community assets to engage residents - as per assets listed above
- Services in community locations/ease of access for residents and those that are less likely to engage
- Events to engage with residents - fairs, community days, open days, etc
- Surprised drugs and alcohol weren't more of an issue, and felt there was missing data around support being provided from the third sector e.g. on benefit advice (not just Citizens Advice)
- Education statistics and inequalities - have we lost the good practice that was in Lillington (Pupil Premium etc.)? Review what's happened in Lillington on Education?
- Food poverty - free school meals, breakfasts, school holidays etc. Use N.Warks Edible Links model? Promote existing schemes e.g. Breakfast Clubs & Tesco's, Chase Meadow holiday club, Youth Centre provide holiday food, Crown Roots at Acorn Court £2 for 2 course meal (but tends to be older people)

- Encourage eating more fruit and veg. Check if schools are providing this. Promote cooking skills courses etc.
- Reduction in Children Centres - loss of impact on early years. Promote new Children and Family Centres and services. Promote other services available for young families e.g. buggy walk sessions, Warwickshire Wildlife Trust activities
- Obesity and lack of exercise. Promote Fitter Futures. Health eating campaign e.g. involving a local celebrity? July Pub in the Park - Tom Kerridge? Promote community gardens and allotments, & link up to target areas e.g. Lillington East - lots of fast food outlets and not great access to fresh fruit & veg. Look at the impact of technology on children & stop access during school time?
- Depression and mental health - often linked to financial worries. Do more detailed analysis - is it split by demographic/income/areas? Is it one group or a mix? Is Social isolation in the elderly an issue? Is there a link to drugs and alcohol? Money management skills - Citizens Advice outreach sessions on Universal Credit, but need more accessible venues. Leamington Night Shelter provide a money coach via Christians Against Poverty - 3 week course. Salvation Arms and Helping Hands also provide support. Way Ahead have won Big Lottery funding on digital literacy. Credit Union sessions at Packmores. Poverty Action Forum - attended by 25 groups. Anxiety in school children - look at more support?
- High crime rate - Is there a link to drugs and alcohol?
- Lower cancer screening rates. Promote cancer screening and benefits
- Transport - links to isolation. Make it easier to access information on transport e.g. we searched on the WCC website for 'Transport' and nothing came up! Had to put in Health Transport. VASA now provide community transport in Warwick District - SWFT reps were not aware of this
- Green and open space data
- Drug and alcohol data
- It would be helpful to have a summary of housing provision versus what volume of new housing is in the pipeline for the geography and wider district, the latter on the basis that people will freely move between geographies
- Is new housing serving the existing community or is it facilitating the movement of people into the area?

Table A - Theme: Health and Well-being

- **Concerns around health service provision for those with complex learning disability in the community.** This included:
 - Transport to health appointments, reduced bus services, also inhibiting access to inclusive activities ie clients with LD accessing Tiger Feet dance classes
 - Clients being delayed hospital admissions due to inadequate hoisting equipment being available
 - Lack of GP flexibility in the area for these clients, so when they are in respite and out of area for registered GP their GP will not pick up their health needs and a new one must be sort on a temporary basis
- **Access to GP's in the area**

- Map identifies services are concentrated in main populated hub, the remaining areas have few services.
- New extended GP services were not being offered up front when patients are attempting to book appointments via this service
- **Social prescribing** - very limited opportunities in the local area to refer people to - a social prescribing ethos simply does not exist at the moment
- **General Transport issues:** including
 - Access to clinics, GP's and hospitals
 - Contributes to social isolation which in turn increases demands on health
 - Concessionary scheme is vital to maintain as the people who use their bus passes really need this transport
 - Lack of information regarding bus timetables or up to date services
 - Need for public transport particularly when considering the impact of increased traffic and air quality issues
- **Issues regarding communication** - how to effectively communication what services exist in local areas, ongoing issue of directories in the area for signposting people to health services are invariable out of date
- **A need to develop community ethos and volunteering in the area**
- **Concerns about young people** in the area and high levels of anxiety and obesity, opportunities for young people is often dependent on income ie after school clubs, concerns about RISE waiting times and arts being removed from school timetable
- **A need to work with families** to change behaviours that ultimately will affect children, and ongoing work of health visitors is required
- **Lack of data regarding alcohol and drugs** in the area, would be useful to have CGL data for the area and links to domestic abuse, and mental health

Some urgent priorities:

No school representation, how will this information be cascaded to schools regarding JSNA findings and outcomes of the stakeholder event

Early intervention is the key to prevention and this is where services should be commissioned
Creative solutions need to be developed

Table B - Theme: Issues Affecting Young People

- Poverty
- Low Aspirations/low self-esteem/low confidence
- Historical family addiction and involvement in crime
- Crime
- Mental health
- Poor living conditions
- Overcrowding
- Non engagement with services/schools
- Drug use - in particular weed (normalised/self-perpetuating)

- Media normalising sexual behaviour
- Lack of resources/professionally trained staff/youth work to support young people
- Lack of opportunity to raise aspirations of young people
- Lack of fulfilling career opportunities - increases the likelihood of engaging in criminal activity to make money
- Intergenerational unemployment
Low incentive to engage in education (role models/historical attitudes toward schools and education within the home environment)

Table C – Theme: Poverty, Income & Affordability

- Promote & Extend money management schemes. Promote Christians against Poverty money coach. Promote Lillington Youth Centre Prospects jobs and training opportunities
- Promote Christians against Poverty money coach. Promote Lillington Youth Centre Prospects jobs and training opportunities. Develop a Jack Munroe ‘Cooking on a Bootstrap’ course (Quids in magazine). Lillington Community Cafe - coming soon
- Promote support via existing links. Night Shelter, Salvation Army, Helping Hands, Leamington Food Bank on Tuesdays
- Promote Universal Credit support. Here to Help, Digital Literacy/Access, Crown Routes. Youth Centre, Brunswick Hub outreach sessions - jobs, training, Support to Council tenants - advice, budgeting support
- Promote and enhance Transport. Promote VASA.org.uk, Ring & Ride community bus service. Look at more community transport schemes
- Financial Inclusion - ownership/coordination. Role for an agency to coordinate this area including credit unions and support available. Poverty Action Forum bi-monthly group - advocacy, mapping, support, 21 Sept breakfast meeting

Table D – Theme: Rural & Social Isolation

- Under reporting of LSI likely
- Access to GPs
- Support for carers: limitations of the current service provided by Carers Trust
- Broadband: good in urban area, poor in rural area
- Transport an issue for older people and vulnerable groups
- Youth support needed, especially in Lillington
- Support for forces and ex forces personnel
- Isolated pockets of BME communities
- Single parents likely to suffer isolation

Possible projects:

- Dial-a-ride service transport service.
- Inter-generational projects to help tackle issues around isolated youth and single parents
- Signposting of forces and ex-forces personnel to existing support, e.g. British Legion and SSAFA
- Young People First support for youth worker training and youth club set-up
- Outreach for blood tests, e.g. community centre

Existing community assets:

- Crown Roots Project
- Library
- Children's Centre
- Community Centre
- GP Practice
- Churches Together
- Sporting amenities
- Pubs
- Community Development Worker
- Village Halls

JSNA CONSULTATION RESULTS – CUBBINGTON, LILLINGTON & WARWICK DISTRICT EAST

Background

Two surveys, one aimed at residents living in Warwickshire the other aimed at professionals working in Warwickshire were launched on 1st June 2018. A download of responses was taken on the 1st July 2019 and forms the basis for this analysis.

Professional Survey

There were a total of 17 responses to the survey for people that work across Cubbington, Lillington & Warwick District East. Respondents include: NHS workers, police, public sector, and third sector/voluntary sector.

Residents Survey

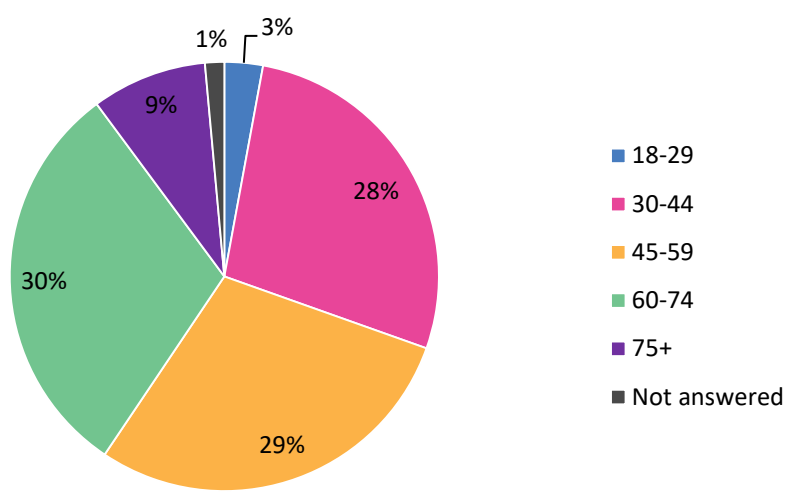

There were 70 responses to the consultation survey by local residents living in the Cubbington, Lillington & Warwick District East JSNA area. Analysis of responses from residents living in the Cubbington, Lillington & Warwick District East JSNA area follow.

Cubbington, Lillington & Warwick District East JSNA Area – Residents Survey Analysis

Profile of respondents

The majority of responses were from females (n=44, 62.9%) with 23 (32.9%) responses from males and the remaining respondents preferred not to say or did not answer. Almost a third of all respondents (30.0%, n=21) were 60-74 years old (Figure 1).

Figure 1. Percentage of survey responses by age group

Of the 70 responses received, almost half (n=33, 47.1%) were from households described as Couples (Married/ Civil Partnership/ Cohabiting/ Other) without children (Figure 2).

The majority of respondents categorised themselves as White - English/ Welsh/ Scottish/ Northern Irish / British (85.7%, n=60). The remaining 10 respondents categorized themselves as either White – Any other background (n=2) or preferred not to say (n=6), Asian or Asian British – Indian (n=1) and Not

answered (n=1). Approximately half of respondents (48.6%) were Christian (n=34). The remaining respondents said they had no religion (28.6%, n=20) or preferred not to answer (12.9%, n=9), Other (n=3), Buddhist (n=1), Jewish (n=1), Sikh (n=1) and not answered (n=1).

Just over one fifth of respondents (21.4%, n=15) said they had a long standing illness. A third of respondents (34.3%, n=24) described themselves as an employee in a full-time job (Figure 3).

Figure 2. Number of responses by household type

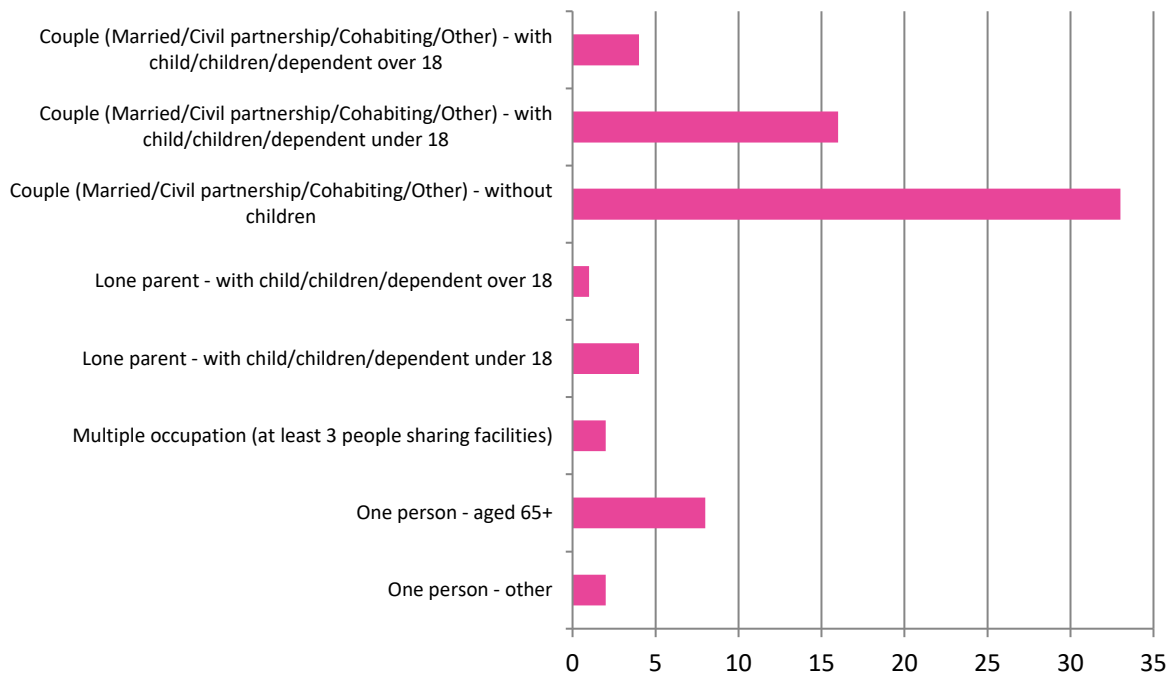

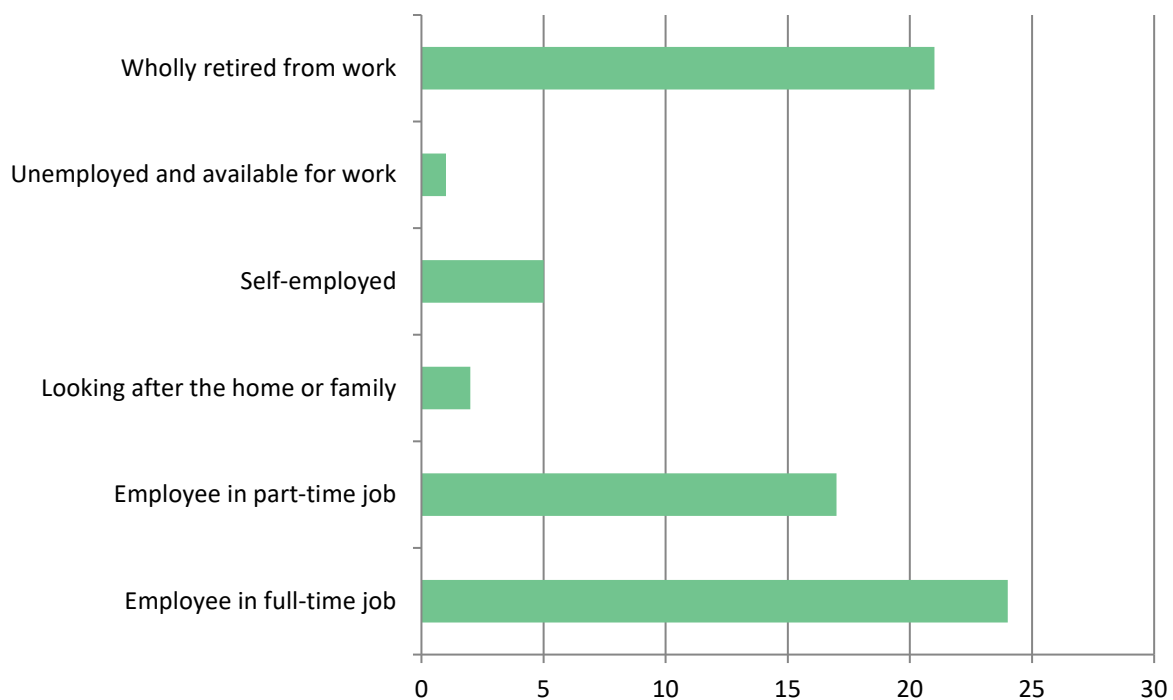

Figure 3. Number of responses by employment status

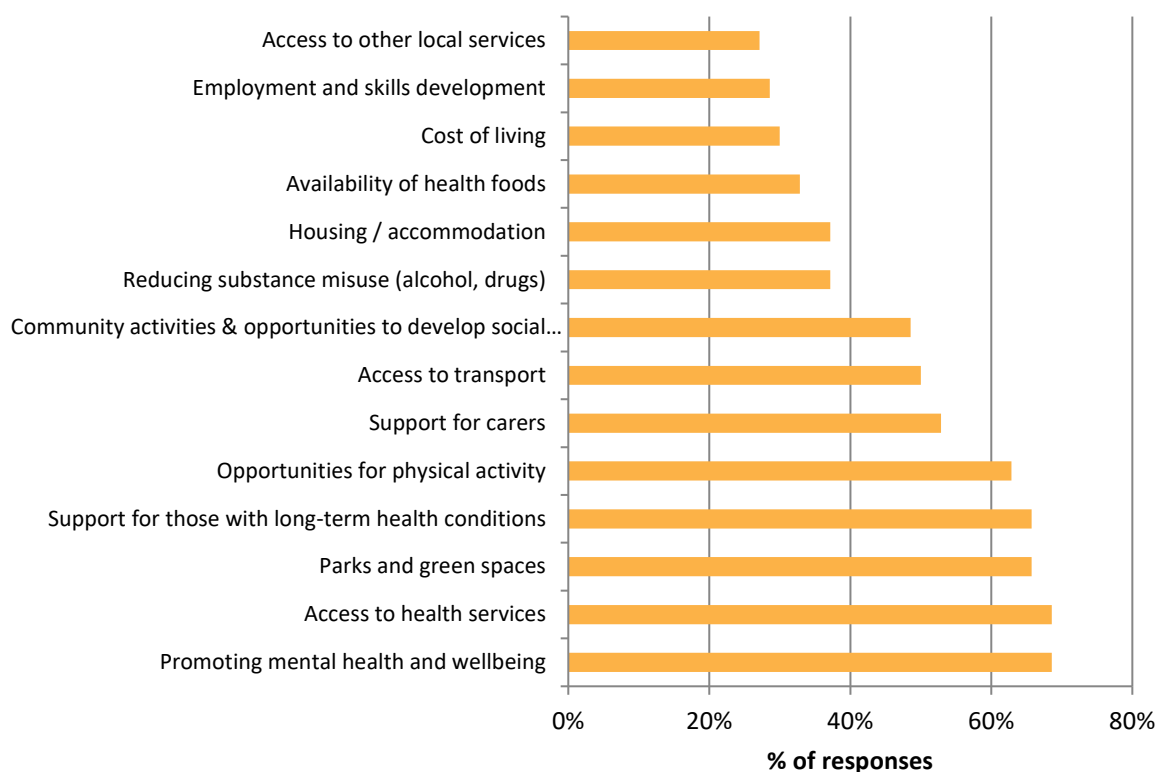

Health & Well-being

Residents were asked which they felt are priority areas for health and well-being in their local area. They were given a variety of options and were able to select each that applied (Figure 4).

The five responses that had the highest percentage of responses were:

- Promoting mental health and well-being (68.6%, n=48)
- Access to health services (68.6%, n=48)
- Parks and green spaces (65.7%, n=46)
- Support for those with long-term health conditions (65.7%, n=46)
- Opportunities for physical activity (62.9%, n=44)

Figure 4. Percentage of respondents choosing the listed areas as a priority for health and well-being in the local area

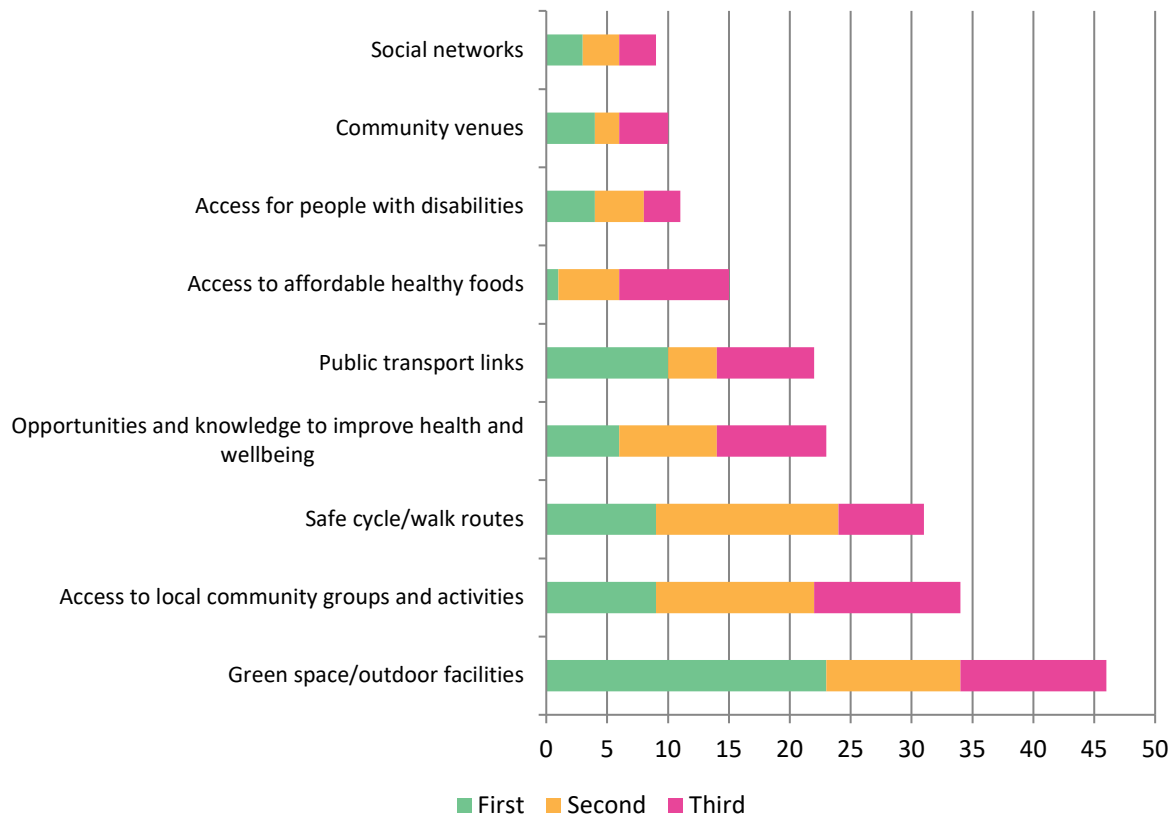

Local area/local community

Residents were asked to identify the top 3 things they valued about the local area/local community which supports positive health and well-being (Figure 5).

Green space/outdoor facilities were listed by the most respondents (65.7%, n=46) respondents as being one of the top three things they valued about the local area which supported positive health and well-being with 23 respondents respectively ranking this as the thing they valued most. Access to local community groups and activities was the next most common response with 48.6% (n=34) of respondents giving this as one of the top three things they valued with 9 respondents ranking this as the thing they valued most. Access to online services was valued by the fewest number of respondents (by just 5 respondents).

Figure 5. Responses to the question “What are the top 3 things that you value about the local area/local community which support positive health and well-being?”

Improving health & well-being in the local area

A further open text question was asked what 3 things could be better in your local area to improve health and well-being. Areas for improvement that were mentioned most frequently were:

- Public transport / traffic improvements
- Transport/traffic improvements
- Access to health services
- Access to mental health support services
- Information/promotion of local activities which support health and well-being
- More community venues
- Opportunities for volunteering and support for carers

Residents were also asked what local activities/events they would like to see in the area. Activities that were mentioned most frequently were:

- Neighbourhood projects (e.g. local litter picks, community days/events)
- Wider choice of local clubs (e.g. singing, gardening, craft groups)
- Exercise opportunities (classes, clubs, local running/cycling events, outdoor gym equipment)
- Dementia support
- A Well-being/Health Fair
