

## Warwickshire County Council

The volunteers have been working hard at vegetation clearance and smaller tasks. This is generally work that gets done in winter when the ground is not suitable for replacement or maintenance of gates and bridges when there is not good access.

Examples of the work undertaken are shown below

Way marker installation – Rugby

Bridleway Clearance – Nuneaton and Bedworth

**Tysoe – bridge replaced by volunteers**

Equipment has been serviced ready for use over the summer.

Some volunteer groups have expanded and have been provided with equipment to allow them to work better with larger numbers of people.

The ROWIP consultations are reaching the final stages of preparation and will be distributed when complete.

Day to day work continues.

The cost of stock and equipment has increased. This will impact on the budget.
