Look Ahead

- CAMS Pro: - Embed new system and look to utilise all its functionality. Good support from IT which is providing ongoing training, so the team is confident in utilising this system to its full potential
- Bridge Structures - Officers are continuing to put together and add to the list of structures in need of maintenance or replacement.
- Team - Team is still not fully staffed however the good news is that there is now in place a Technical Administration Officer to provide extra support to the team
