KEY FOR INFORMATION BELOW

Those in red are most at risk of automation in future leading to a reduction in demand for employees, as machinery/control systems replace the need for such physical human efforts. Those in blue may also be affected, but to a lesser extent. Those in black are considered to be extremely low risk and unlikely to be effected by automation.

● = High risk of automation ● = Potential risk of automation ● = Low risk of Automation

INDUSTRIES CURRENTLY EMPLOYING THE MOST PEOPLE
