

Valuing nature in local decision making....

NATURAL
ENGLAND

For People Wildlife/Habitats Growth

South Mercia Area Team... Who we are

“We want a healthy natural environment, rich in natural habitats and species, delivering benefits for both people and nature”.

How we want to do this locally...

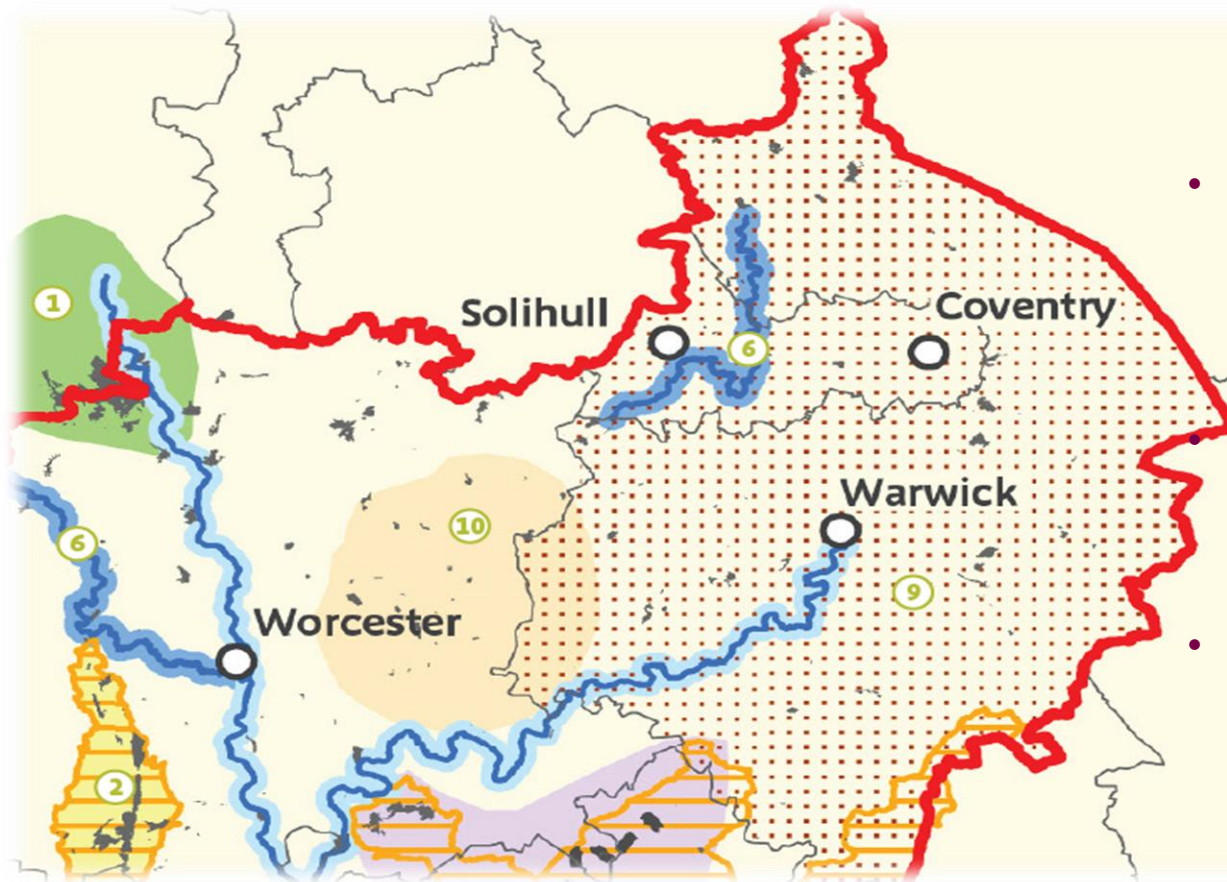

- Outcome Driven
- Early Proactive Engagement
- Integrated Delivery
- Ecosystems Approach
- An enabler of Sustainable Development

**NATURAL
ENGLAND**

Warwickshire a key focus area... a great opportunity!

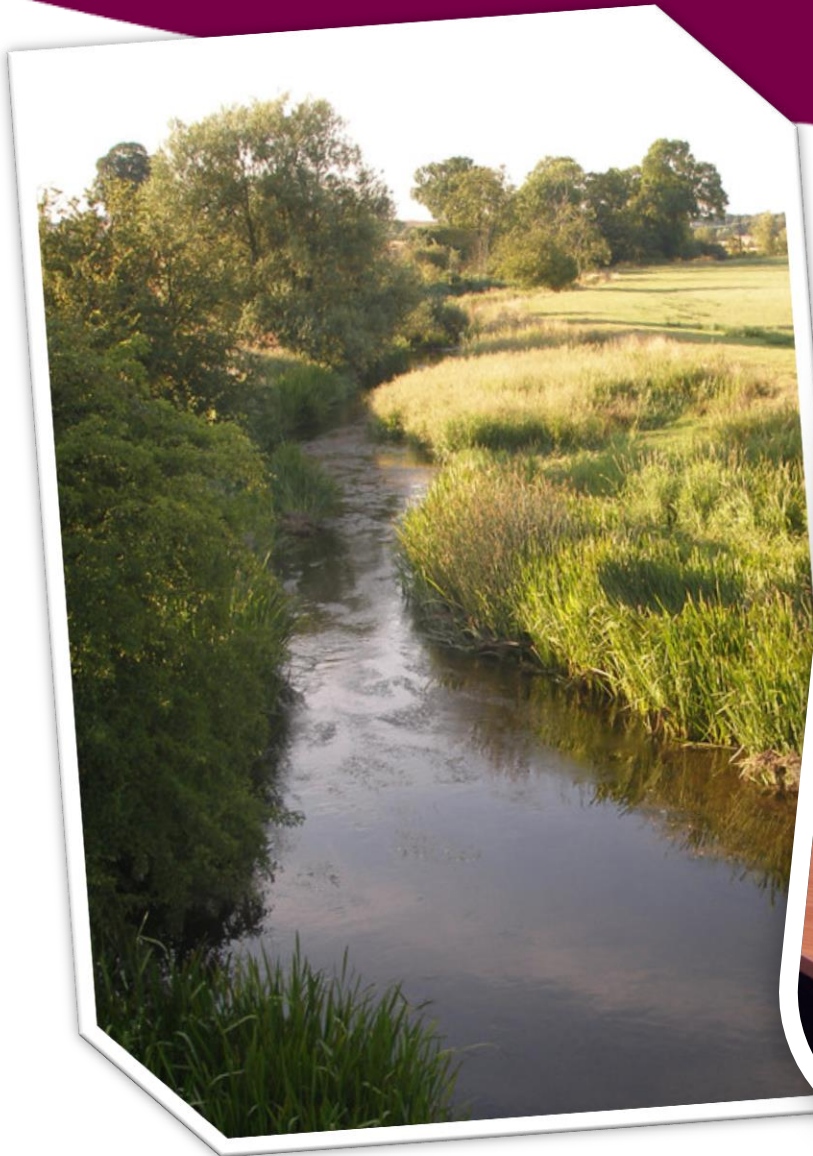

We seek to

- Build on and enhance the natural environment through involvement with national and large scale development schemes, including HS2
- Enable and support green infrastructure projects in the urban/semi-urban areas of Warwickshire and nearby Coventry and Solihull.
- We are developing a more joined up approach to planning and licensing work with Warwickshire County Council
- Maintain and enhance European Protected species populations through chargeable advice at the early planning stage.

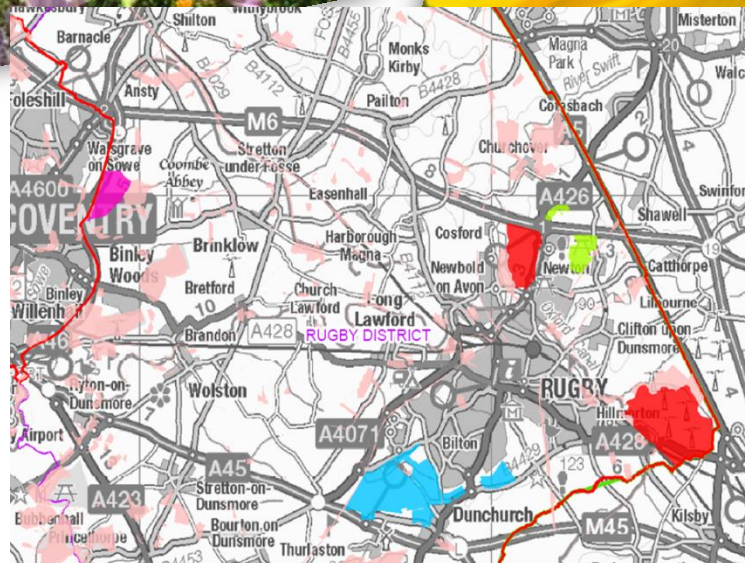

Moving forward: In practice....

The River Blythe – An Ecosystem Approach

Improving outcomes for wildlife and pollinators in the development context...

NATURAL
ENGLAND

**We want to work with you to
push forward the value of
nature conservation locally!**
