Introduction

Welcome to the annual Employers Event. Following on from the success of last year's workshops, we have taken on board your feedback on how you would like this year's training day to look.

This year we have included a general overview of the administration process for employers on how to deal with starter's right through until they leave the pension fund.

We are also delighted to have our actuary, Hymans Robertson come along to deliver a presentation on 'Clean Data' to emphasise the importance of making sure the data is correct. Incorrect data can have a significant impact on the contribution rate you pay as an employer which could mean you end up paying more than you should.

Copies of all notes and presentations will be available on our website in due course – <http://www.warwickshire.gov.uk/pensionemployers>

We hope you find this training useful. As always we would welcome any feedback or suggestions you have about today's event.

Neil Buxton

Pension Services Manager

Process for dealing with employees joining the pension fund

All new employees should be enrolled into the pension scheme as long as they have a contract of 3 months or more.

Employees should all be given a membership form to complete and return to us. You should give them one for each of the jobs they have with you and a different reference number allocated to each job. This is so we can differentiate between records when forms and enquiries come in.

You should then complete a new entrant to the pension scheme form that will give us all the details necessary for us to set up a new record in the scheme. Please do not wait for the employee to return the membership form as this will only delay the setting up of records if they don't return it.

Every employee has to be allocated a contribution band that will determine the rate of contribution they will pay each month.

Contribution Table 2018/19

Band	Actual pensionable pay for an employment	Contribution rate for that employment	
		Main Section	50/50 section
1	Up to £14,100	5.5%	2.75%
2	£14,101 to £22,000	5.8%	2.9%
3	£22,001 to £35,700	6.5%	3.25%
4	£35,701 to £45,200	6.8%	3.4%
5	£45,201 to £63,100	8.5%	4.25%
6	£63,101 to £89,400	9.9%	4.95%
7	£89,401 to £105,200	10.5%	5.25%
8	£105,201 to £157,800	11.4%	5.7%
9	£157,801 or more	12.5%	6.25%

If a member has an increase in pay that would mean them changing the contribution rate, you have the choice of either implementing the change the following month or changing it from the following April. If you change it mid-year then we only want you to put one line on the annual return not split it between the two contribution rates.

50/50 Scheme

Some members may find that they cannot afford to pay all the contributions their contribution band refers to. Rather than opt out altogether members can join the 50/50 scheme where they pay half the contribution rate for half the benefits.

The employer continues to pay the same rate, amends the payroll and sends us the forms informing us of their decision.

As an employer you are required to complete the box on the reverse of the form so that we know when the 50% contribution started.

Opting out

Members can choose to opt out of the scheme altogether but need to complete a form to do so. You cannot give your employee an opt out form but should refer them to the website where they can download one. A person cannot opt out until they have started work. Once you have received the completed form you should then opt them out from the next available pay run.

If a member chooses to opt out within 3 months of starting work the refund they are due has to be paid through the payroll by your payroll provider. If they are a member for longer than 3 months but under 2 years then we have to pay the refund.

In order for us to process the refund we have to have a copy of the opt out form and an employer opt out form where you confirm if a refund has been paid or not, and which month it was refunded, or whether we have to do it. If we have to do it we will need a notice of termination with the details of the contributions paid.

Expression of Wish

This is a form used to nominate someone to receive a death grant in the event of a member's death. This nominee can be anyone and members can nominate as many people as they want as long as the total % payable adds up to 100%. If an expression of wish form is not on record then the grant is paid into the estate of the deceased.

Additional Pension Contributions (APC)

Employees can pay additional contributions to enhance their retirement benefits.

These can be paid as a lump sum or as regular contributions taken from their pay each month. Deductions made each month attract tax relief same as the normal pension contributions do. The APC calculator on our website needs to be used to calculate the cost of purchasing the extra pension they wish to buy.

For regular contributions the contract has to be for a minimum of 12 months, with the maximum being up to their normal pension age.

They have to be a member of the full scheme

The member can purchase as much as they want up to a maximum of £6,822 (this changes each year)

Additional Pension purchased is payable at retirement and is paid on top of normal pension benefits.

If the member chooses to retire early (before their Normal Pension Age) the extra pension they have bought will be reduced for early payment. If they choose to draw their pension after their Normal Pension Age any extra pension bought is increased because it's being paid later.

Payments can stop at any time but we need to be advised of the last date the contributions were taken for.

If the member dies in service then no extra pension from the APC will be payable as the additional pension is for the member only not any beneficiary.

Lost pension

In some circumstances members can buy back lost pension (for example where they have had a period of authorised unpaid leave) where you the employer must meet two thirds of the cost of buying back this lost pension if they decide to buy it within 30 days of the end of the absence period (or such longer period as you the employer may allow).

Employers should therefore give members details of the pay they have lost so they can calculate what APCs they need to pay within this 30 day period if they choose to.

If this information is not given out in time then the employer has the discretion to allow the member to buy it with them still meeting two thirds of the cost.

Additional Voluntary Contributions

This is the second way members can enhance their pension benefits. We need the AVC form completed so that we know how the member wishes the deduction to be invested.

There are a number of funds to choose from and the investment can be spread over a number of funds.

Contributions are deducted by the employer but sent directly to Standard Life not Pension Services.

Invested on the Stock Market so returns can go down as well as up.

Get in touch with Ian Morris on 01926 412682 for information on how to set everything up.

At retirement, the fund can be used to buy a pension from Standard Life or another life assurance company of the members choosing. They will also have the option of converting their AVC fund to additional pension in the Local Government Pension Scheme.

Changes to records

You should notify us of personal or job related changes to a member's record as soon as you are informed.

This includes things like name changes, status changes, address changes etc

The changes form should always be completed by you as the employer. If your payroll provider completes the form you should check it and sign it off as correct.

We will not accept these or any other information directly from your payroll provider

Forms

All forms for both Employees and Employers can be found on our website.

This means you do not need to keep a copy and you always get to complete the most up to date forms.

Process for dealing with employees leaving the Pension Fund

If a member finishes their employment we will always need a notice of termination. The member's pension will either be deferred or refunded, unless the member is over 60 in which case they will be able to take payment of their pension.

Notices of termination

A notice of termination is needed when an employee leaves their role. A notice of termination includes all the details that we need to calculate members deferred pension, refund or pension payment and will include all the employees' details that you hold, the leaving date and reason, the contributions for this and the last financial year, the full time equivalent pay for the last year of work and the actual pay received for this year and the last financial year.

LOCAL GOVERNMENT PENSION SCHEME WARWICKSHIRE PENSION FUND

Telephone number: [Click here to enter text.](#)

Email: [Click here to enter text.](#)

Return completed form to: { [HYPERLINK "mailto:pensions@warwickshire.gov.uk"](mailto:pensions@warwickshire.gov.uk) }

If the member has been off for any reason in the last 2 years you will need to include the Assumed Pensionable Pay under section 6 as well.

In some cases we do not need the full time equivalent pay. This is for members who are only in the post 14 scheme. We will still ask you to complete this as some members who may have only been with you since 2014 might have transferred in previous service where the final salary needs to be taken into account.

We will check the calculations on the termination and you will get a query if something does not add up. IE if a members contribution rate is 5.5% but the contributions divided by 5.5 and multiplied by 100 does not equal the CARE pay then you will get an email asking for clarification.

Refunds

A pension is refunded if the member has less than 2 years' service in the pension scheme and has not had a transfer in. We are also not able to pay a refund if the member has a deferred pension or a pension in payment with another local authority or if they are due to commence employment within local government within a month.

The amount payable is the total contributions less 20% tax. We will not refund employers contributions but these are taken into account when the employers contribution rate is assessed.

We will send the member a leaver form asking for their bank details and for them to confirm that they have not got any previous pensions with any other authority.

Deferred pension

A pension is deferred when a member leaves their employment, has more than 2 years of service or has had a transfer in and is not old enough to take payment of their pension. We will send the member an initial calculation of their deferred pension and will send a statement each year.

We will also write to the member just before their 60th and 65th birthday giving them the option to take their pension.

Retirement

There are 4 different types of retirement – ill health, redundancy/efficiency, flexible and normal.

We will need a notice of termination for all cases of retirement and we would normally provide an estimate before a member retires.

To provide an estimate we will need an estimate request form completing with similar details to a notice of termination.

Death in service

If a member dies in service there will be a death grant of 3x their actual pay paid to their nominated persons.

There will also be a spouses pension payable to an eligible partner. A child's pension can also be payable if there are surviving children under the age of 18, or 23 if they are still in education. Both pensions will be enhanced as though the member has worked up till their retirement age.

Death on deferred

The death grant for a deferred member is 5x the deferred pension.

There will also be a spouses pension payable to an eligible partner. A child's pension can also be payable if there are surviving children under the age of 18, or 23 if they are still in education. These pensions will not be enhanced.

Death on pension

The death grant for a pensioner is 10x the pension less what has already been paid. This means that a death grant is only payable for 10 years after retirement.

There will also be a spouses pension payable to an eligible partner. A child's pension can also be payable if there are surviving children under the age of 18, or 23 if they are still in education. These pensions will not be enhanced.

An employer wouldn't normally be involved in a death of a pension or a deferred member but on occasion the deceased family might contact the former employer rather than the pension section.

Retirement Benefits

When can you retire?

The LGPS pension is payable in full from Normal Pension Age, this is linked to State pension age (but with a minimum of age 65). However, a member can choose to retire and draw their pension from the LGPS at any time from age 55 to 75, provided they have met the 2 years vesting period in the scheme. If they choose to take their pension before their Normal Pension Age it will normally be reduced, as it is being paid earlier. If they take it later than their Normal Pension Age it is increased because it is being paid later. A member must draw their benefits in the LGPS before their 75th birthday.

If a member retires because of redundancy, business efficiency or permanent ill health, the benefits can, provided they have met the 2 years vesting period in the scheme, be paid immediately.

If a member voluntarily chooses to retire before, on or after their Normal Pension Age they can defer drawing their benefits but the pension must be put into payment before age 75. If the pension is drawn after Normal Pension Age, the benefits will be paid at an increased rate to reflect late payment.

There are specific rules relating to each type of retirement, so the sections below look at the different ways of retiring, and the implications.

Voluntary early retirement

If a member chooses to retire early and is over the age of 55 they can elect to take their benefits immediately with reduction. The reductions applied are to reflect the fact that the pension will be paid for longer.

The reduction is based on the length of time (in years and days) that the member retires early i.e. the period between the date your benefits are paid and your Normal Pension Age. The earlier the member retires, the greater the reduction.

As a guide, the current percentage reductions for retirements up to 13 years early are shown in the table below. Where the number of years is not exact, the reduction percentages are adjusted accordingly.

Number of Years Paid Early	Pension reduction Men	Pension reduction Women	Lump Sum (for membership to 31 March 2008)
0	0%	0%	0%
1	5.6%	5.2%	2.9%
2	10.8%	10.1%	5.7%
3	15.5%	14.6%	8.5%
4	20.0%	18.8%	11.2%
5	24.0%	22.7%	13.7%
6	27.8%	26.4%	16.3%
7	31.4%	29.8%	18.7%
8	34.7%	33.0%	21.1%
9	37.7%	36.1%	23.4%
10	40.6%	38.9%	25.6%
11	44.2%	42.2%	N/A
12	47.6%	45.5%	N/A
13	50.9%	48.6%	N/A

You as an employer can agree not to make any reduction and pay the costs for early payment of the pension. The reductions applied to women are lower; this reflects the life expectancy for a woman is slightly higher to that of a man so the fund would have a longer time to re-coup the reduction.

Flexible retirement

A member may wish to consider a gradual move into retirement by flexibly retiring from age 55, providing the member has met the 2 years vesting period in the scheme, the member can draw their pension helping them to ease into retirement. It is usual for the member to have to take a reduction in hours or move to a less senior position to be considered for flexible retirement. You as the employer will have a policy on flexible retirement.

If the member is between the age of 55 and 60 and has pre 2008 service and will qualify for protections under the Rule of 85 there may be costs to the employer, if you are unsure and do not want to pay the costs for a member taking flexible retirement please contact our office for an estimate before agreeing to flexible retirement.

Redundancy or business efficiency retirement

If a member retires on the grounds of redundancy or business efficiency, provided they are aged 55 or over and they meet the 2 year vesting period, the main benefits are payable immediately without any early retirement reductions.

However, any additional pension paid for by Additional Pension Contributions (APCs), Additional Regular Contributions (ARCs) or Shared Cost Additional Pension Contributions would be paid at a reduced rate if the retirement occurred before your Normal Pension Age (to take account of the additional pension being paid for longer).

If the member has not reached their Normal Pension Age there will be costs to the employer, you can request an estimate of the costs.

Ill health retirement

To qualify for ill health benefits the member must have met the 2 years vesting period in the scheme. You, as the employer, based on an opinion from an independent registered medical practitioner, must be satisfied that the member will be permanently incapable to do their job until their Normal Pension Age and are not immediately able of undertaking gainful employment.

Ill health benefits can be paid at any age and are not reduced on account of early payment, in fact, benefits could be increased to make up for the early retirement. There are graded levels of benefit based on how likely the employee is capable of gainful employment after they leave. You will not pay any direct pension strain costs for the member retiring on the grounds of ill health; however the liability may affect your contribution rates after the triannual valuation of the Fund.

Gainful employment means paid employment for not less than 30 hours in each week for a period of not less than 12 months.

The different levels of benefit are:

Tier 1 - unlikely to be capable of gainful employment before Normal Pension Age, ill health benefits are based on the pension already built up in the pension account at the date of leaving the scheme plus the pension that would have built up, calculated on assumed pensionable pay, had the member been in the main section of the scheme until Normal Pension Age.

Tier 2 - unlikely to be capable of gainful employment within 3 years of leaving, but are likely to be capable of undertaking such employment before Normal Pension Age, ill health benefits are based on the pension built up in the pension account at the date of leaving the scheme plus 25% of the pension they would have built up calculated on assumed pensionable pay, had they been in the main section of the scheme until Normal Pension Age

Tier 3 - likely to be capable of gainful employment within 3 years of leaving, or before Normal Pension Age if earlier, ill health benefits are based on the pension already built up in the pension account at leaving. Payment of these benefits will be stopped after 3 years, or earlier if the member is in gainful employment or becomes capable of such employment, provided they have not reached their Normal Pension Age. If the payment is stopped it will normally become payable again from Normal Pension Age. The employer must arrange for an ill health review after the member has been on ill health retirement for 18 months. The medical practitioner must sign a review form and advise if the member is to be uplifted to a tier 2 ill health retirement or if the pension is to cease after the 3 year period. This is an employer responsibility we do not remind employers to arrange reviews. The pension will be pre-set to cease after the 3 year period.

All ill health retirement forms can be found on our website. You will need to send the ill health certificate together with a notice of termination specifying the date the pension is to be put into payment. You will also need to provide the pay details; the pay figures must include the Assumed Pensionable Pay (APP) if applicable, this being the amount the employee would have been paid should they not have received a reduction in pay due to being in receipt of sick pay or had a reduction in hours due to their illness/injury.

Deferred members can also request their benefits to be put into payment before Normal Pension Age due to ill health. In such cases, if a member contacts us we will advise them to contact their former employer, in order for the employer to arrange an assessment with a medical practitioner.

Estimate requests

We are happy to provide estimates for costs to you, under the new GDPR that came into force in May 2018 we can continue to provide you with the level of costs as the employer but we can only provide you with information on the level of benefits due to the employee if they have given you permission to receive this information. There is an estimate request form on our website.

Please note we do not provide multiple estimates for members with potential leaving dates within six months of each other as there will be no material difference to the figures. We also request, wherever possible that you do not request more than three estimates for any one member in a twelve month period.

Assumed Pensionable Pay

Assumed Pensionable Pay or APP is the pay that needs to be used in cases where the member has received reduced or nil pay. It is an attempt to recreate the scenario of what the person would have been earning if they were working as normal.

APP applies when:

- A member has been on leave due to sickness or injury and received reduced or no pay.
- A member has been on child-related leave such as maternity or paternity leave. It does not include the period of unpaid leave at the end of child related leave.
- A member has been on reserve forces leave.

In the above circumstances the amount added to the total pensionable pay for the year in which the leave was taken should be the assumed pensionable pay and not the pay that was actually received.

How to calculate Assumed Pensionable Pay

Assumed Pensionable Pay is calculated as an annual rate and then applied to the relevant period. The relevant period starts on the date the employee drops to reduced pay.

To calculate the APP:

- Calculate the average of the 3 months' pay prior to the start of the relevant period. Any pay that is not payable every period needs to be removed.
- Gross the 3 month average up to an annual figures

If there are not 3 months complete pay periods then use the pay periods that are available.

If the member is paid weekly then the pay period should be the previous 12 weeks' pay period instead.

Proportioning

The same method should be used for proportioning APP as for part periods of pensionable pay. Therefore you should use whatever method you would normally use to calculate one day's pay from an annual rate. For three days in August for example, this could be:

$$\frac{\text{Annual rate} \times 3}{365} \quad \text{or} \quad \frac{\text{Annual rate} \times 3}{12 \times 31} \quad \text{or} \quad \frac{\text{Annual rate} \times 3}{12 \times 22}$$

Which formula you use would depend on how pensionable pay is normally derived for a part month and in the case of a week is it 5/5, 5/6 or 5/7 of a week's pay. There are probably other methods in addition to examples shown.

Question

If a member goes on reduced pay on the 5th April 2015 what pay period should be used? (Assuming the member is paid monthly)

Example

A member's pensionable pay is reduced due to half pay for the period 1st July to 31st December due to sickness absence. The employer calculates the assumed pensionable pay by calculating the average of the three complete months' pensionable pay received before the pay period in which the pay is reduced.

April pensionable pay = £1,200
May pensionable pay = £1,200
June pensionable pay = £1,300

(In this case the member's pay increased from 1st June to £1,300 per month (£15,600 per year) due to an annual pay award.)

Therefore, $\pounds 1,200 + \pounds 1,200 + \pounds 1,300 = \pounds 3,700$ divided by 3 = $\pounds 1233.33$ per month. The employer would inform the member's pension fund that the assumed pensionable pay for the period 1st July to 31st December is $\pounds 1233.33 \times 6$ (months) = $\pounds 7399.98$.

This does seem unfair as the actual pay that the member would have been receiving is $\pounds 1300$ per month rise if the member hadn't been off sick and would have earned $\pounds 7800.00$ in that time period.

Calculation

A member goes on reduced pay due to sickness on the 18th July 2017 to 30 November 2017. The APP is therefore calculated on the pay received from April to June.

<u>Month</u>	<u>Pay</u>
April	$\pounds 1500$
May	$\pounds 1600$
June	$\pounds 1750$

Calculate the Assumed Pensionable Pay?

What not to include in calculations

If during the 3 months (or 12 weeks period) used to calculate the APP the member ceases one employment and is re-employed on a new contract of employment, the calculation of the value of the APP is based on the pensionable pay received in the new employment only using the number of complete weeks/months available in the employment.

Any payments that are not a consistent payment each month or that the member is not obligated to do/receive. This means that any overtime payments would not be included.

Employer and employee contributions

The member pays their basic pension contributions on the reduced pay they actually receive whereas the employer will pay contributions based on the assumed pensionable pay.

APP and separate employments

The calculation of APP uses the 3 most recent months (or 12 most recent weeks) in which the member received pensionable pay relating to that employment before the reduced or no pay period. If during the 3 months (or 12 weeks period) used to calculate the APP the member ceases one employment and is re-employed on a new contract of employment, the calculation of the value of the APP is based on the pensionable pay received in the new employment only using the number of complete weeks/months available in the employment.

Adjusting the APP Figure

Once set, APP is not subsequently adjusted unless it continues for a period that crosses two 31st March dates. Where an employee is, for example, on long term sick leave, APP is adjusted at midnight on the second 31st March following the date APP commenced. The adjustment is the percentage adjustment specified in the HM Treasury Revaluation order for that second scheme year ending on the 31st March. If the relevant period continues for a further year it will be revalued again at midnight on the next 31st and so on.

Keep in touch days

In cases of employees on relevant child related leave who return for a KIT day, the pensionable pay for that day should be added to the cumulative pensionable pay rather than the APP if the actual is higher than the assumed. The APP applying after the KIT day will be the same as that applying before the KIT day; in other words, there is no need to recalculate it simply because of the KIT day.

Jury service

The Local Government Pension Scheme 2014 has no specific rules for jury service. If a member is on jury service where the employer pays the member their normal pay, they will accrue benefits as normal. If an employer does not pay an employee whilst on jury service, the member is obviously on nil pay and will not pay a contribution. It is classed as authorised leave of absence. If the member wishes to buy-back pension 'lost' in respect of a period of jury service they can do so through an APC contract (see section on APC's).

Problems

What happens when a member reduces or increase their hours in the period before they go on leave? The APP would be based on the 3 previous months pay and would therefore not be an accurate representation of what the member actually earned. The employer would also have to pay contributions based on the APP and could therefore be paying a much higher contribution than they would have if the member hadn't been on sick.

This is similar to pay rises and is seen as a by-product of the APP calculation.

Annual Returns (Year End) and Monthly Returns (CT117)

The pensions section will ask you for two different forms throughout the year, the monthly returns – more commonly known as the CT117 and the Annual Returns also known as Year End. Both forms are essential to the administration of the pension scheme for members of each employer. The CT117 is a monthly return and the Annual Return is requested at the end of each financial year.

The Annual Return

The Annual Return provides the data that is used to keep every pension record on our system up to date as required by the Pensions Regulations.

The Annual Return that we receive from you is extracted and uploaded to your employees' pension record held on our system: The system that we use makes it easier to run reports and run background data that auditors request, but it's easier for you to load the information we need into a spreadsheet and reformat it afterwards.

Please note: Because of this, the Annual Return template is designed to the specifications needed to upload the data onto our system; any changes to the template (adding more columns/changing the column name etc.) will prevent the data from being uploaded and we will have to return the Annual Return back to you, so that you can submit the information as originally requested.

The payroll reference and the job reference have to match what we hold on our system as well; otherwise it will not upload the data.

Once the data has been successfully uploaded, it updates the following information onto your employees' records:

- Final Salary or Full time Equivalent (FTE) Salary (calculates every member's final salary pension entitlement. This is linked to all service built up before April 2014)
- Contributions for the year (stored on pension records for triennial valuations and to check CARE pay where needed)
- Career Average Revalued Earnings (CARE) pay (calculates each member's pension entitlement for the financial year)

Any pension calculation, Annual Benefit Statement and Valuation Extract will use the figures supplied by you in the Annual Return. If the figures given are incorrect, it can lead to members not receiving the pension they have paid for and could also result in the employers' contribution rate being increased.

The CT117

The primary purpose of the CT117 is remittance advice for the payment of monthly contributions. **It is therefore important that the remittance advice matches the amount of contributions paid to the fund.**

The automated checks on the return ensure that the remittance advice matches the amount of contributions paid to the fund. The automated checks on the return help both.

Different types of contributions are allocated to separate codes. So each different type of contributions must be allocated to its relevant column.

Why we need both forms

All member data is uploaded from the Annual Return. There is information on the Annual Return that is not requested on the CT117 (e.g. Final pay/ FTE salary) and it is the Employers responsibility to provide the annual totals of contributions and pensionable pay received for the year.

The CT117 is used by the Pensions Administration team to ensure that the correct contributions are paid to the fund by each employer. It is a remittance advice and the data is not uploaded to any pension records. If the Pensions Administrators were responsible for collating the monthly details from the CT117 it would remove the responsibility for the figures from the Employer.

This is why we request the data directly from you on the Annual Return

What could go wrong?

The Pensions Regulator

The Pensions Regulator (TPR) plays an active role in the Local Government Pension Schemes and the processes we use to calculate members' pensions.

If we are unable to send Annual Benefit Statements, provide Annual Allowance savings statements or give our Actuary scheme valuation data by the deadline dates, we have to inform the TPR of the Breach in Regulation. This could lead to the Employers receiving any fine imposed by the TPR for Breach of Regulations.

As already explained, the Annual Return provides the data that is pertinent to keep every pension record on our system up to date as required by the Pensions Regulations.

Active members who have pre April 14 service now holds both a final salary list charting the FTE history of the member as well as a CARE account screen. The pay figures that fill these are extracted from the Annual Return that all employers provide. This data is then used in the:

Triennial Valuation – This is where the Actuaries calculate the fund assets and our liabilities based on our members records. This is assessed every three years by law and it sets the contribution rates for the Employers for those three years. The figures provided on the Annual Return are used to calculate the pension liability for each employer, so your employer rate will be dependent on the data you have provided. Any incorrect salary (e.g. a term time member's entry stating the full 52 weeks final salary instead of the Term Time FTE) will have an impact on the valuation results, which in turn will reflect the Employer contribution rates that will have to be paid for the next three years.

Annual Benefits Statement – Every active member of the scheme should get an Annual Benefit Statement (ABS) each August. It is a statutory requirement that the Pension Fund informs the scheme members of their pension entitlement as well as any other information held on their record

If either the CARE or Final Salary figure on the return is incorrect, the figures on the ABS will be incorrect and could lead to members making ill-informed financial decisions. If no details are supplied on the Annual Return, the member will not get a statement and both the pension fund and the employer are at risk of a Pensions Regulator Breach, with any potential fine possibly passed to the Employer.

Pension estimates – When a member requests an estimate for when they retire, the pay figures given on the Annual Return will calculate the information the member is given.

Annual Allowance – The Annual Allowance is the maximum amount of pension savings an individual can have each year that benefits from tax relief. The Annual Allowance for the 2016/17 tax year onwards is £40,000.

Every year we have to check the pensions growth for each member of the scheme. This is calculated on the 5th April every year. If the limit on pension savings is breached it can incur a tax charge for the member. The FTE and CARE information given on the Annual Return is used to calculate the Annual Allowance for members.

The CT117- Incorrect payments of contributions – If the CT117 form is not completed correctly and does not tally exactly with the amount paid into the pension fund then we will need to contact you to look into this and redo the CT117, creating more work for both you and us.

Retirements: Now that CARE pay calculates a pension every year, the figures supplied on your annual return will calculate all of your employees' pensions. The information provided by you will be used to base their CARE pension income when they retire and the FTE that you give us is used to calculate the Final Salary pension for pre April 14 members.

This is the 1st April / 31st March each year

PENSION SCHEME 2014 - YEAR END RETURN

Year end

Name of Organisation Employers Scheme Number

Contributions for the period Year Employers Cost Centre Code

Green sections can be populated

Name	NiNo	Pay ref	Actual Annual Salary £	Weekly hours	Final Pay (Full time equivalent salary) £	Cumulative Pensionable pay in 100 / 100 scheme	Cumulative 100 / 100 Employees contributions	EE's Rate %	Cumulative Pensionable pay in year £	Cumulative 50 / 50 Employees contributions R2011	50/50 ees rate %	Additional Pension Contributions (Employee) (EAPC)			Employers contributions	Assumed Pensionable Pay £	Standard & Equitable Life AVC Contributions £	Date of STARTING/LEAVING pensionable employment during this year.		Comments
												Add Yr	2006	APC R2009				Total	£	
Grand Total																				

Pay Ref: This is the individual or part reference used to distinguish between records so that the contributions can be attributed to the correct record. Only enter 1 line per pay ref.

Actual Annual Salary: is the amount that the person would earn in a year. If they are part time in this figure should be the part time amount they would earn in a year. This is the figure that you would have used to determine which percentage rate the member should be paying. This should include all elements of pay that have become pensionable under the LGPS 2014 regulations eg. overtime

Actual pay the member received this year ending 31/03/ (unless they are in the 50/50 scheme then see column K). This column

Employees percentage rate, please enter just the figure, no % symbol needed.

Please complete these 3 columns for a member if they are in the 50/50 section instead of columns F,G and I

Add Yr Added Years are a percentage of pay

ARC's : a fixed monthly amount

Additional Pension Contributions Both where the whole cost is to the employee and also the employee element of a shared cost APC

If the member is on reduced pay and the employer contributions have been calculated on Assumed Pensionable Pay then please enter the amount of Assumed Pensionable Pay in this column. The checking column S may show that the employer contributions are incorrect but this can be overlooked if there is a figure in the APP column

Standard Contributions: NOT for ADDED YRS, AVC's, ARC's or APC's

Final Pay (Full time Equivalent Salary)
This is the full time equivalent pay as per the 2008 scheme definition of Pensionable Pay. Where a member works term time only, it must be the full time term time equivalent. It is required for all members to calculate pre 14/14 rights in the LGPS and any members who may transfer another Public Service Pension into the scheme in the future.

Insert Rows

Rows must ONLY be inserted by selecting row 280, then clicking the Insert Rows button.

I hereby certify that the above is a true and correct statement of all salaries, fees and expenses in respect of which

Yellow sections are for you to populate with data as relevant
If you need more than 280 rows then please use this insert rows button to add extra rows to the spreadsheet

Please ensure that a representative person from the employer has completed the signature and date box so we can see that the employer has agreed these figures and we know who to contact with any queries

Date

Guide Notes:

Please note: All queries from the member when they receive their ABS, that is in relation to the information that you have provided will be referred back to you, the Employer.

Every member needs an entry on the return. If a member changes rate or employment during the year there should only be one amalgamated line on the return

NINO (National Insurance Number) is the individual identifier we use to ensure that the member is recorded as paying pension contributions. It is essential that the NINO is accurate, otherwise it will be queried.

Pay Ref is the individual identifier we use to assign the member data on the return to the member pension record. If the pay ref is incorrect the process to input the data will not work and the data will be sent back to you to be corrected.

If we do not receive the corrected information by the TPR deadline, it will have to be manually inputted which not only increases the risk of error, but also any potential Breach of Regulations and charge levied.

There must be one pay ref per line on the annual return. If the same pay ref is supplied on more than one line we will need to query this with you before uploading the data, which can cause delays, resulting in potential Breach of Regulations for not meeting the deadline dates given.

Actual annual salary is not uploaded to the record. It is the salary you have used to calculate the members contribution rate as at 31/03. This is used by us to check the rate is correct.

Final pay (Full Time Equivalent salary) is the pay figure that calculates any members' final salary entitlement. Final salary service was built up in the scheme before April 2014.

The most common confusion with this section is around members who work on term time only contracts. If a member works less than 52 paid weeks a year, the Final Pay figure needs to be pro-rated for the number of paid weeks.

For example: **Full time term time only:**

$48.3 \text{ (weeks worked)} / 52 \times \text{Spinal Column Point (SCP)} = \text{term time salary}$ (This member would be credited with 1 year pensionable service under the pre-2014 Scheme)

Part time term time only (e.g. 25hrs per week):

$(25/37 \times 48.3/52) \times \text{SCP} = \text{term time salary (whole-time equivalent as pensionable pay)}$
(This member would receive 25/37ths of the calendar year as pensionable service – i.e. 247 days under the pre-2014 Scheme)

Cumulative pensionable pay in 100/100 Scheme (CARE pay). The amount in this column will calculate the members' pension for the year in question.

This column MUST include Assumed Pensionable Pay and any other pensionable pay earned in the year. It will be loaded directly onto the members pension account on their pension record.

Cumulative 100/100 employees contributions; this is where the contributions are recorded for members that have paid in the 100/100 Scheme (Care Pay)

***Please Note:** Employee Contributions paid in the year and the corresponding rate must be on one line for the year. Where members have had a change during the year, the contributions must be amalgamated on one line. The rate should be as at 31st March and not split across lines if the rate has changed during the year.*

NB: This is only relevant when members have changed contribution rates whilst still paying into the same Cumulative Contributions section

Cumulative 50/50 pensionable pay in year: Where a member is a member of the 50/50 scheme, the same information applies to these columns as in the 100/100 scheme section. Pensionable pay in the 50/50 scheme must be half of the pensionable pay the member received for the year.

Contributions and the rate must all be amalgamated on one line with the return given as it was on 31st March of the year in questions.

Additional Pension Contributions (Employee) (EAPC) any additional pension contributions the member pays must be uploaded into this section. As annual allowance can be as low as £10,000 for some members, the additional contributions (on an AVC for example) could trigger a tax charge

Assumed Pensionable Pay (APP): If the member was entitled to APP during the year, the amount needs to show in this column. It must also appear in either the 100/100 cumulate pensionable pay section or the 50/50 cumulative pensionable pay section. This column is for information to check any discrepancies and will not be uploaded to the member record.

Standard & Equitable Life AVC Contributions: If the member pays any In House AVC contributions, please include the yearly amount in this section, as the TPR and HMRC now state that if a member pays AVC in the LGPS, it must be included when calculating a member's annual allowance.

Date of STARTING/LEAVING pensionable employment during this year: Please include the date that the member started or left the scheme **For the Financial Year that the Annual Return is in relation to.**

The information we ask for

The first section at the top is the information that is specific to each employer, name, employer code, ledger code and employers rate are all completed by us so you don't need to change these (1). The Year is also completed already. The only box at the top that you need to complete is 'Contributions for the period' (2)

The yellow columns show where we want you to put most of the data. The first 3 columns are straightforward, Surname of member, Initials and National Insurance Numbers (3).

'Pay ref' should be the individual job reference or pay reference assigned to this job or post so that if the member has more than one job we can easily see which job the contributions relate to (4).

The next column should be the actual annual salary that you have used to base the members contribution rate on. For part time members this would be their part time salary and should include all pensionable elements of the members pay. This should correspond with the members contribution rate 'EE's rate' and if the rate does not match with this salary then the checking column to the right of the EE's rate column will flag this up. (5)

The column headed '100/100 pensionable pay in period' is the total amount that the member earned this month and has paid contributions on. The column headed '100/100 Employees contributions' should be the amount of contributions that the employee has paid in this month based on the pay in that period. The amount of contribution is checked against the pensionable pay and the employees rate that has been entered and is flagged up in the column next to the contribution column. (6)

If the member is in the 50/50 section then the 50/50 columns should be completed instead of the 100/100 sections, but they need the same information as the 100/100 columns (7)

The next section is for additional contributions paid by the member and the employer. In order they are member contributions for Added Years, Additional Regular Contributions, Additional Pension Contributions, and Employers Additional Pension Contributions. It is important that the

member contributions go into the correct column as each has its separate code. (8)

The next column is for the normal employer contributions and are checked based on the pay you have entered for the month and the employers rate in one of the top boxes. (9)

The column for Assumed Pension Pay should be completed when the member has become entitled to Assumed Pensionable Pay to be used, for example if they are on reduced pay due to sickness. The employer's contributions would be on the normal salary so they should look too high in comparison to the normal salary, but by completing the APP column we can see why there is a discrepancy (10)

If a member starts or leaves part way through a month, by letting us know in the starter/leaver columns we can easily see if the salary looks too low for that month. We do now pick the leavers up so that we can request a notice of termination from you if you haven't already sent it, but putting the leaving date in here does not replace the notice of termination as we will still need all of the financial information on it. (11)

The last column is the one for comments. As we need the amount that you put on the return to match the amount you pay, we do not expect you to amend any errors immediately. For example if it turns out that an employer is on the wrong rate and so it flags up red, if you put a comment in to let us know you have picked this up and will amend it next month then we can happily accept the form. In the next month if the adjustment is made and makes the contributions look wrong again, another comment to confirm you have made the adjustment means that we can accept the form and the auditors are kept happy. (12)

The final section of the form is at the bottom. Here you can add extra rows if needed to the spreadsheet using the pink button. Also we need you to type in your name and date so that we know who from the employer has sent this so who to go back to with any queries (please note this cannot be someone from a third party payroll provider). You also need to type in your signature next to the total box to confirm that this is the amount you have paid to us. (13)

Opt out form

Warwickshire County Council

Notice to opt out of pension saving Opting out of the Local Government Pension Scheme in England or Wales

The Local Government Pension Scheme (LGPS) allows you to save while you are working in order to enjoy a pension once you retire. It is one of the best occupational pension schemes in the UK. What's more, the LGPS is provided by your employer who meets a large part of the cost of providing the excellent range of secure benefits, so it's an extremely valuable and important part of your employment package.

You might be thinking of opting out of the LGPS for a variety of reasons. Whatever the reason, it's worth taking some time to look at the benefits you could be giving up. A brief summary of these is included in the "Declaration" section of this form.

Opting out won't save you as much in take home pay as you may think. In most cases, you will pay more tax and National Insurance if you opt out of the LGPS. A basic rate tax payer paying pension contributions of £100 a month will pay £20 more tax and their NI will go up by about the same if they opt out.

If you want to know more about the costs and benefits of being a member of the Local Government Pension Scheme please contact our office or visit our website, details overleaf.

Although changes to the LGPS are planned for 2014 (for details see the national LGPS web site at www.lgps.org.uk) please remember that the LGPS is, and will continue to be, one of the best occupational pension schemes in the UK.

Whatever your reasons for considering opting out of the scheme, we ask that you give this matter careful consideration before making a final decision. You may wish to take financial advice before making a decision to opt out. If you are opting out of the LGPS due to advice you have received you should ask for this advice in writing.

Your employer cannot ask you or force you to opt out. If you are asked or forced to opt out you can tell The Pensions Regulator - see www.thepensionsregulator.gov.uk.

Equally, no one can force you to remain a member of the scheme but, if you elect not to be a member, you should understand the implications both for you and your dependants.

This is the form that your employee should be completing and giving to you so that you can opt them out of your payroll system. An email or note etc is not acceptable. They can be downloaded from our website at Warwickshire.gov.uk/pensions

You need to complete the box on the reverse to tell us who validated it please

Warwick, CV34 4RL

Your annual benefit statement 2017

Dear

I am pleased to enclose your 2017 annual benefit statement from the Local Government Pension Scheme (LGPS).

Your statement is an estimate of your LGPS benefits, based on pay and employment details held by the Warwickshire Pension Fund on 31 March 2017. These details have been provided by your employer. The statement is based on the regulations in place on 31 March 2017 and your current normal pension age. Please read the notes carefully.

Neil Buxton
Pension Services Manager

Section 1 | Your personal and employment information at 31 March 2017

Full name	▶	
Partnership status	▶	
Email address	▶	
Employer	▶	Date joined fund ▶
Section of LGPS	▶	Job reference ▶

Section 2 | Summary of your total benefits at 31 March 2017

Standard benefit option	or	Maximum lump sum option
Annual pension ▶		Reduced annual pension ▶
Lump sum retirement grant For membership before 1 April 2008 ▶		Increased lump sum retirement grant ▶

Notes | [Section 1](#) / [Section 2](#): Page 4

1 ◀

Page 1 – Personal details and how much your pension is currently worth

Section 1 shows the personal details that we hold for you such as name, marital status, date of birth and which job this statement is for.

Section 1 | Your personal and employment information at 31 March 2017

Full name	>		
Partnership status	>		
Email address	>		
Employer	>	Date joined fund	>
Section of LGPS	>	Job reference	>

Section 2 | Summary of your total benefits at 31 March 2017

Standard benefit option

Annual pension	>
Lump sum retirement grant For membership before 1 April 2008	>

Maximum lump sum option

Reduced annual pension	>
Increased lump sum retirement grant	>

Section 2 shows how much total pension you have built up in this job. On the left it shows your basic pension and lump sum. On the right this shows how much your pension would be if you swapped some of it to take a larger lump sum

This shows you where to look in the notes for more information

Section 3 | How your pension is calculated

Please note: The benefits shown in this statement are based on the figures below which have been supplied by your employer. It is important that you check these figures and contact your employer quickly if they are wrong.

Your final salary pensionable pay

Your CARE pensionable pay – main section

Your CARE pensionable pay – 50/50 section

This the pay we use to work out the pension you built up before 01/04/2014. It is the full time equivalent amount even if you work part time

This is the amount you earned from 01/04/2014 – 31/03/2015. If you were in the 50/50 section then it is split to show how much you earned when you were in the different sections

Your pension is always calculated on your pay so its important to check that it looks right. If you think it looks wrong then you can check with your employer as they provided the pay details

Page 2 continued...

Your pension is made up of two separate parts, your final salary pension and your new CARE account

This is the amount of years and days you built up in the final salary scheme

Final salary part

CARE pension

This is how much pension you built up this year in the new CARE account

Section 4 | Summary of your standard total benefits on page 1 is made up of:

Your final salary pension scheme

For membership to 31 March 2008 of

For membership from 1 April 2008 to 31 March 2014

Total final salary annual pension

Lump sum retirement grant based on membership to 31 March 2008

Your total CARE account

Opening balance at 1 April 2016

Adjustment for cost of living at 1 April 2016

In-year build-up

Total CARE closing balance

This is the amount of pension you built up in the final salary

This is the automatic lump sum you built up before 01/04/2008

If you add these two together this is the total current pension figure from the front page of your statement

This is a breakdown of what your CARE pension was made up of

Your total CARE in-year build-up is made up of:

Scheme year April 2016 to March 2017

	Your CARE pensionable pay – main section divided by 49	➤
+	Your CARE pensionable pay – 50/50 section divided by 98	➤
+	Additional pension bought	➤
+	Transfers in	➤

This is pension you built up just by paying into the main scheme

This is pension you built up by paying into the 50/50 section of the scheme

If you have purchased extra pension or bought back unpaid leave this will be shown here

If you have had a transfer in from another pension in the last year, the pension it bought with us will be here

If you were to die while still an active member of the scheme this is the amount of pension we would pay to your spouse/ civil partner or nominated cohabiting partner

Section 5 | Value of death in service benefits at 31 March 2017

Annual survivor's pension

Lump sum death grant

Who you want to receive the lump sum death grant

If you die while still an active member of the scheme we also pay 3 times your annual pension as a lump sum

These are the nominations you have made for the lump sum death grant.

This is the age you can retire with no reduction to your pension

Section 6 | Estimated benefits if you stay in the scheme until your normal pension age

Your normal pension age (NPA)	>
Estimated final salary pension built up to NPA	>
Estimated CARE pension built up to NPA	>
Total estimated annual pension at NPA	>
Total estimated lump sum retirement grant	>
Estimated final salary survivor's pension at NPA	>
Estimated CARE survivor's pension at NPA	>
Total estimated survivor's pension at NPA	>

This is amount of pension and automatic lump sum that you might expect to build up by your normal pension age if you were to stay on the same money and hours until then

This is the amount of survivors pension that might be available to your spouse/civil partner or nominated cohabiting partner at your normal pension age

Section 8 Your membership history up to 31 March 2014					
Employer	Period from	Period to	Calendar length	Percentage of whole time	Period of membership

This is your employment history up to 31/03/2014. If you are part time this is shown here and the total membership is used to work out the final salary part of your pension

This is where your part time hours are shown. They are shown as a percentage of full time hours (37 hours)

Only service up to 31 March 2014 is shown in this section because service is only used to work out the final salary part of your pension. It is not used to work out the new CARE pension from 1 April 2014.

Section 7 | Tax and your pension

Tax limits apply to pension savings. These limits are called the lifetime allowance and the annual allowance. The lifetime allowance was reduced to £1 million for the tax year 2016/2017. Going forwards the standard lifetime allowance will increase each year in line with the consumer prices index.

Lifetime allowance

The percentage of your lifetime allowance used by the current value of your LGPS benefits shown in this statement

This section tells you how much of your Lifetime Allowance this pension uses up.

Points to note for the employer

The estimates in the statements are completely based on the information that you have provided to us. All service is based on the hours you have previously informed us of and the salary details are based on the CARE and FTE salaries that you provide in the annual return.

If the employee queries the salary used we have to refer them to you as you provided the figure and we cannot amend anything unless you confirm there was an issue and provide us with updated information.

If we don't receive the annual return from you in time to load all 180(ish) employers on to the system and work through all of the errors and queries before the date we need to run the statement data, we may not be able to provide statements to your staff. If we miss the statutory deadlines to get these statements out this may result in a fine. If the delay is down you not providing the information we may unfortunately have no choice but to pass this fine on. Fortunately we have not yet been in this situation thanks to your efforts to get the returns to us on time

If you have a lot of queries from your members and would like to arrange for someone to come out and speak to your staff about the statements please email pensions@warwickshire.gov.uk

Warwickshire Pension Fund Contacts
