

# Transforming Care Update

Ali Cole - Transformation Lead

# Transforming Care Plans

- Warwickshire, Coventry, Herefordshire and Worcestershire worked together to make a plan in September 2015
- NHS England gave us £825,000 pounds for Warwickshire and Coventry to pay for the changes we need to make
- Now we are working closely with Solihull and have to update our plans by April 2016
- We can apply for more money

# Partnership Group

- In Coventry and Warwickshire, there has been a Transforming Care Partnership Group who make sure the Transforming Care programme is working well.
- The Group is made up of people from the learning disability partnership boards and from the autism partnership board.
- Solihull are going to join this group
- Someone from this group will attend the Transforming Care Board each month

# Enhanced Team – December 2015

Training

Know  
people in  
our area

good personal  
plans for when  
things change

Work  
with  
people in  
hospital

Support  
staff and  
carers

# Mental Health Acute Liaison Nurses

- These nurses are specialists in working with people with a learning disability and autism
- They will support people and staff working in mental health services.
- When someone with a learning disability needs support with a mental health problem the mental health staff will have the skills they need to give the right support to that person.

# Emergency funding

- Sometimes people need more care and support very quickly when their needs change.
- An emergency fund has been set up so that the process of approving funding does not get in the way of giving people the support they need.

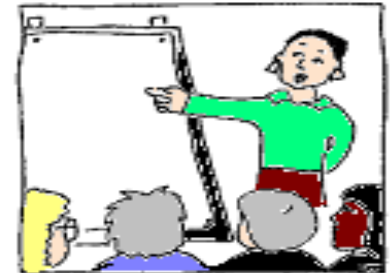

# Short term accommodation

- Sometimes people need a safe place to stay for 1 or 2 days if their home has been damaged, or if their carer arrangements have broken down
- Some accommodation in Solihull and North Warwickshire is being refurbished so that people can go there if they need to.
- Other options will be looked at as well.

# Next we will

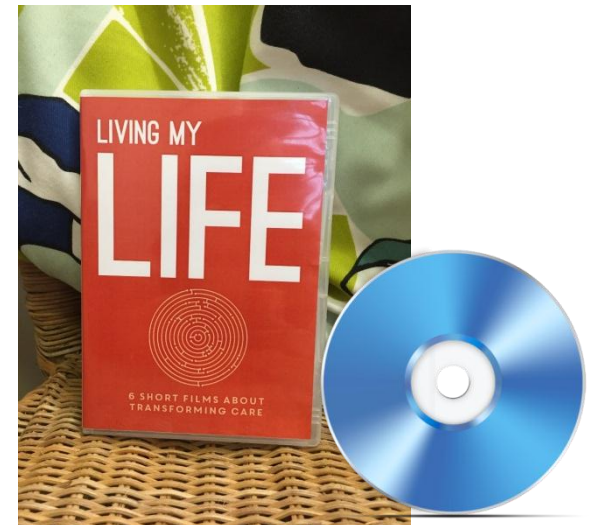

- Increase the size of the Enhanced Support Team so that they can support more people
- Training for staff in mainstream services so that people with learning disabilities get more support
- Emergency fund for packages of care
- Close Gosford ward

# Next we will

- Review all respite services and speak to people about what they want to make sure we have good choices for people
- Use our DVDs to change the culture and teach people about why it is so important to support people to live good lives out of hospital

# Children and Young People

- What support do children and young people need to stay out of hospital?
- What support do children and young people need so that they do not go into 52 week residential placements away from their families

# Website

- We will have a website so that people can see what we are doing
- The website will have links to peoples' stories from the Living My Life DVD

# Questions?
